

Personal feedback on the “Erasmus+ Project” Sigismondi Anna

4A

In December I took part in a fantastic Erasmus project and I went for one week with four other students and three teachers to Athens. We met people from six other European countries and it was beautiful to see the comparison between the different cultures. In particular, I loved meeting teenagers who live in another part of Europe and discovering that we have a lot of hobbies and habits in common. Of course there were also a lot of differences and sometimes it was difficult to meet half way because we did not have the same desires and not everybody was used to being on time. Anyway, it was such a great experience and it was a wonderful opportunity to visit a beautiful city, meet new friends and have fun together. I recommend travelling whenever you can because it's so amazing and interesting!
